Importance of Differentiated Instruction

- Students across our classrooms vary greatly in background, cultures, academic aptitude, interests, and motivation (Parsons, Dodman, & Burrowbridge, 2013).

- In response, differentiated instruction can be utilized to meet unique student needs (Watts-Taffe, Laster, Broach, Marinak, Connor, Walker-Dalhouse, 2012).

- Differentiating instruction can focus on the process of learning, the products or demonstrations of learning, the environment of learning, or the content being learned (Tomlinson, 2001).

- What are the characteristics of an effective agriculture teacher according to the research?
- What characteristics of an effective teacher do you embody?
- Why do you want to teach?
- What is your commitment to students?
- How will you incorporate the total program model?
Results from Fall 2018

- Students were required to complete two of the options.
- 46 submissions from the class.
- Forty percent (n=18) completed Option #1 - Write a Thank You Letter to a Former Teacher.
- Remainder of submissions were equally divided between the elevator speech, the visual representation, and the graphic organizer.
- None of the students completed Option #5, which required a review of related research.
Examples from Fall 2018

"It is the supreme art of the teacher to awaken joy in creative expression taking place in the classroom.

Lessons Learned / Advice to Others

- Does Option #5 (Review of Research) need to be revised or eliminated?
- Are there additional options to be included such as a TED talk, sales/announcement poster, Instagram/social media story, or film storyboard?
- Do students like having multiple options?
- Grading can become tedious. A rubric was used to grade the submissions from Fall 2018, but the continued development of a more comprehensive rubric will be helpful to create a more efficient grading process.
- Examples of exemplary work are being compiled and digitally archived to share with future classes.
THANK YOU!
