We are excited that you are considering a career with Wilmington College! Wilmington College is a career-oriented liberal arts institution affiliated with the Society of Friends (Quakers). Our beautiful main campus is located in southwestern Ohio. We offer a comprehensive compensation and benefits package for full time positions including group medical, dental, vision, life and disability, TIAA-CREF, tuition remission, paid vacation and holidays.

We encourage you to review our website and learn about our history, what we are doing today and how we are preparing for tomorrow. It is an exciting time here at Wilmington College.

Interested applicants should submit a detailed cover letter, curriculum vitae, and a two-page statement of teaching philosophy. Please specify position of interest in the letter of application and subject line of email (if submitting electronically). For positions requiring degrees, unofficial transcripts of college work are helpful. Submit materials to the Director of Human Resources, Wilmington College, Pyle Center 1187, 1870 Quaker Way, Wilmington, OH 45177-2499 or email to humanresources@wilmington.edu or follow instructions in the position information below.

Wilmington College is an equal opportunity employer and will not discriminate unlawfully in employment matters on the basis of race, religion, gender, color, ancestry, national origin, age, disability or any other category protected by law. EOE Wilmington College conducts background investigations including criminal, work history and credential confirmation on all employees as a condition of continued employment. Some positions may require additional motor vehicle record review and drug screening.

Assistant Professor of Agriculture

Wilmington College is accepting applications for the position of Assistant or Associate Professor of Agriculture in Animal Science at our main campus in Wilmington Ohio. This is a nine-month, tenure track position. The department values innovative teaching and faculty committed to engaging pedagogies, collaborative and interdisciplinary endeavors, global perspectives and providing hands on experiences to our students on our academic farm.

The candidate will teach courses in Computer Applications in Agriculture, Food Science, Careers in Vet Medicine, Beef Science, Poultry Science, Sheep Science, Swine Science, and Meat Animal Science. The candidate will also assist the department's development of a food systems and sustainability centered curriculum by working on developing courses in animal science and food system management, and species classes.

Willingness to teach in multiple modes and delivery formats is preferred. Previous teaching experience at a 4-year institution, MSc required, Ph.D. preferred. US farm experience desired.
